11:59 PM Arrival in Edmonton.

You are driving your own vehicles on this adventure. Make plans to allow for weather and highway conditions. We are expected to drive up to the CAT on each day. A 4x4 with good tires is strongly recommended. There are lots of vehicles on this type there if yours is not.

Stuff to bring.

- FAT skis. There are some at Cariboo, they are \$25/day to rent. They are regular camber skis and work well in deep snow. If you can get a rockered ski that is even better. See Sundance ski shop, Pacesetter ski shop for other rentals. DO not bring skinny skis hoping for "face shots", you'll HATE your life. Also, Powder boards are a thing, IF you have never used a board in deep snow be prepared to move the bindings back!
- Some people use ski tracers, long colorful ribbons used to find skis in deep snow. They are a Pain in the ass every time you put your skis on though. But do help a lot with finding the ski. MagicBus has several pairs if you need. Let me know and I'll bring some.
- Camera, this will be something to photograph for sure. Helmet cams etc. Know that if you drop it in the snow, it's GONE!
- FOOD. Bring lots of good quality snacks for the CAT. Have a back pack full each day of sandwiches, (no stinky meat please), fruit, jerky, etc.
- Water and liquids, replenish your fluids every time you're in the Cat. Absolutely NO alcohol will be allowed in the CAT.
- Several pairs of Gloves, and two goggles if you have them. Goggles fog lots and having two pairs is better. Gloves just get wet.
- Plan on cold weather, you won't be able to change once we depart. It's cold at the top.
- Bring Lots of sunscreen SPF 15 or better 30.

All the CAT Guides have full credentials (Association of Canadian Mountain Guides Full Mountain Guide, Association of Canadian Mountain Guides Full Ski Guide, Association of Canadian Guides Apprentice Ski Guide, Canadian Avalanche Association Operations Level 1 and 2 and Wilderness First Aid 80 hour certification)

It's going to be AMAZING!!!
